

CMMC Workshops

Cybersecurity Maturity Model Certification (CMMC 2.0) is a required certification for all businesses that are contractors of the US government's Department of Defense (DoD) with comprehensive cybersecurity requirements built on NIST special publication 800-171 self assessment. The CMMC will require DoD contractors to implement cybersecurity protections standards for controls including access control, incident response, physical protection, and system and information integrity. The CMMC framework is designed to protect Federal Contract Information (FCI) and Controlled Unclassified Information (CUI) that is shared by the DoD with its contractors and subcontractors based on the Maturity Level requirement. Businesses containing CUI must be at least Level 3 compliant whereas if it contains only FCI it only needs Level 1 compliance. NIST special publication 800-171 self assessment and third party audit is required. Many variables influence the effort required to prepare a system for audit and authorization. HanaByte can automate and implement compliance services and is able to conduct multiple CMMC workshops to guide related personnel through the processes prior to submission to an official third party audit.

KEY FEATURES OF CMMC 2.0

Scope

- ✓ Perform workshops on CMMC requirements -- educating key stakeholders, technical personnel, and support teams on a variety of topics. Workshops are interactive and are used to learn more about your business

Personnel

- ✓ Security Consultant(s) will be assigned to the engagement for a flat fee

Customer Responsibilities

Provide access to related documentation and in-scope systems

Deliverables

- ✓ Delivery of a variety of workshops covering CMMC Maturity Levels requirements
- ✓ Regular remote meetings to track progress that best fits your schedule

Our Services

Cloud Strategy & Workshops

Let your best friend in security work with you to develop and execute a robust cloud security strategy. We also offer expert-led interactive workshops to develop security best practices.

Security & Compliance Assessments

Our experts will evaluate your organization's security controls and procedures against industry standards, providing a detailed readiness report and actionable recommendations to achieve your security and compliance goals.

Cloud Migrations & Modernization

We ensure a secure cloud migration/modernization of your applications, data, and infrastructure. Our experts will provide guidance and support throughout the entire process, from planning and execution to post-migration optimization.

DevOps & Security Engineering

Our DevSecOps experts are ready to assist with maturing a software development lifecycle, creating cloud automation, and performing tool integrations to foster secure engineering practices. We specialize in CI/CD, containers, and infrastructure as code.

Application & API Security

Our services provide end-to-end protection for your applications and APIs. Our experts will work with you to implement best practices and the latest technologies to keep your data and systems secure from development to deployment.

Vulnerability Management & Penetration Testing

Our experts use the latest tactics, techniques, and procedures to perform comprehensive security assessments. We go beyond automated tooling to simulate real-world attacks, providing an in-depth analysis of your security posture.

About HanaByte

We are a team of skilled, empathetic individuals with a passion for cybersecurity. We believe in creating a safe and secure online environment for everyone, and we're committed to the pursuit of that goal.
