

Chronicle SIEM and SOAR Workshops

Embark on a transformative journey into the realm of cybersecurity with our Chronicle SIEM and SOAR Workshops, where technical expertise meets approachability.

In these workshops, we decode the intricacies of SIEM and SOAR in a manner that is both engaging and enlightening. Not only do we define these terms, but we guide you through their workings, offer real-world examples to make concepts tangible, and provide actionable advice for safeguarding your digital frontier. As your trusted advisor, we go beyond education; we foster a true partnership in assisting with technical expertise where possible. Join us in this educational adventure, where cybersecurity is not just a necessity but an empowering experience.

Scope

- ✓ Engage with your team and perform a series of interactive workshops that include: hands-on training, dissemination of educational materials, and presentations to allow for insight on Google Chronicle SIEM and SOAR.
- ✓ Tailored, comprehensive guidance on protecting against advanced threats, drawing from real-world examples, and connecting theoretical knowledge to tangible scenarios to enhance understanding and organizational implementation.

Deliverables

- ✓ Delivery of workshops and training materials for Google Chronicle SIEM and SOAR
- ✓ Delivery of prescriptive guidance on Google Chronicle SIEM and SOAR
- ✓ Regular remote meetings to track progress that best fits your schedule

Personnel

- ✓ Security Consultant(s) will be assigned to the engagement for a flat fee

Customer Responsibilities

- ✓ Provide access to relevant documentation (including policies, procedures, and diagrams) and personnel.

Our Services

Cloud Strategy & Workshops

Let your best friend in security work with you to develop and execute a robust cloud security strategy. We also offer expert-led interactive workshops to develop security best practices.

Security & Compliance Assessments

Our experts will evaluate your organization's security controls and procedures against industry standards, providing a detailed readiness report and actionable recommendations to achieve your security and compliance goals.

Cloud Migrations & Modernization

We ensure a secure cloud migration/modernization of your applications, data, and infrastructure. Our experts will provide guidance and support throughout the entire process, from planning and execution to post-migration optimization.

DevOps & Security Engineering

Our DevSecOps experts are ready to assist with maturing a software development lifecycle, creating cloud automation, and performing tool integrations to foster secure engineering practices. We specialize in CI/CD, containers, and infrastructure as code.

Application & API Security

Our services provide end-to-end protection for your applications and APIs. Our experts will work with you to implement best practices and the latest technologies to keep your data and systems secure from development to deployment.

Vulnerability Management & Penetration Testing

Our experts use the latest tactics, techniques, and procedures to perform comprehensive security assessments. We go beyond automated tooling to simulate real-world attacks, providing an in-depth analysis of your security posture.

About HanaByte

We are a team of skilled, empathetic individuals with a passion for cybersecurity. We believe in creating a safe and secure online environment for everyone, and we're committed to the pursuit of that goal.
