

SOC 2 Advisory Service

SOC2 is a voluntary compliance standard that specifies criteria and guidelines in how organizations should handle customer data security based on five trust service principles (TSPs) - security, availability, processing integrity, confidentiality and privacy. SOC 2 reports are unique and conform to the organization in line with specific business practices. Many variables influence the effort required to prepare a system for audit and authorization. SOC 2 reports are a continuous effort to implement and evaluate controls consistently. HanaByte can automate and implement compliance services and is able to advise related organization personnel conducting a SOC 2 readiness assessment before submission to a formal SOC 2 audit. We can coach you on selecting an audit and certification firm (CPA - Certified Public Accountants), appropriate for your business.

There are two types of SOC 2 reports:

Type 1 describing the organization's systems and its compliance with the trust principles at a certain point in time

Type 2 detailing the operational efficiency of the systems and controls over a period of time

Scope

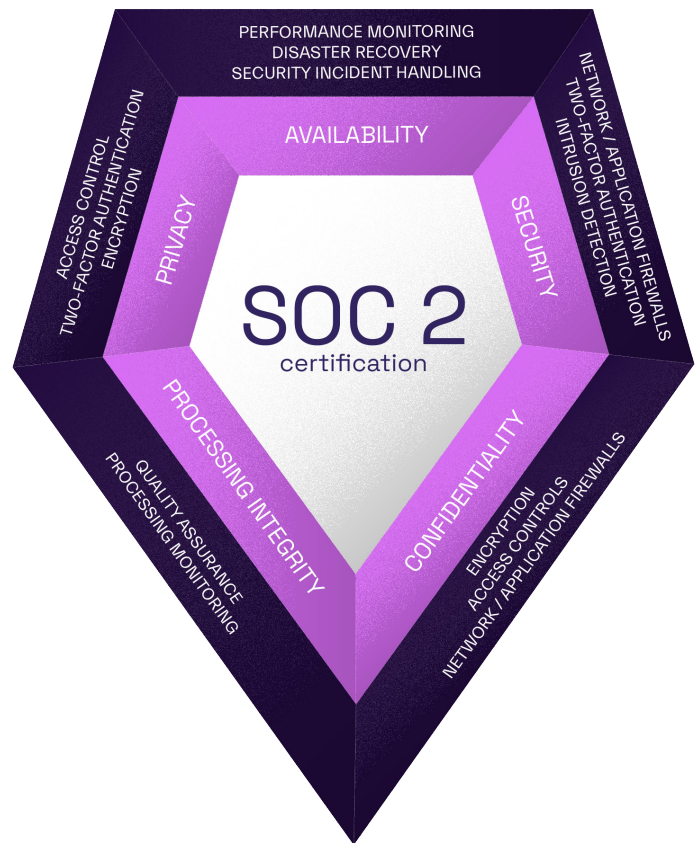

- ✓ Guidance in assessing your existing services and its control implementations, infrastructure, software, people, policies, procedures, and relevant documentation against known frameworks in accordance with SOC 2 relevance
- ✓ Guidance through SOC 2 processes and authorization - including the importance of educating key stakeholders, technical personnel, and support teams on a variety of topics.
- ✓ Guidance in which TSPs are relevant to your organization since it isn't required to audit every TSP in the SOC audit report.

Deliverables

- ✓ Regular meetings to counsel SOC 2 processes and review paths including topics of TSPs
- ✓ Regular meetings to provide recommendations with third party companies

Personnel

- ✓ Security Consultant(s), billed hourly as needed for the engagement

Customer Responsibilities

- ✓ Provide access to related documentation and in-scope systems

Our Services

Cloud Strategy & Workshops

Let your best friend in security work with you to develop and execute a robust cloud security strategy. We also offer expert-led interactive workshops to develop security best practices.

Security & Compliance Assessments

Our experts will evaluate your organization's security controls and procedures against industry standards, providing a detailed readiness report and actionable recommendations to achieve your security and compliance goals.

Cloud Migrations & Modernization

We ensure a secure cloud migration/modernization of your applications, data, and infrastructure. Our experts will provide guidance and support throughout the entire process, from planning and execution to post-migration optimization.

DevOps & Security Engineering

Our DevSecOps experts are ready to assist with maturing a software development lifecycle, creating cloud automation, and performing tool integrations to foster secure engineering practices. We specialize in CI/CD, containers, and infrastructure as code.

Application & API Security

Our services provide end-to-end protection for your applications and APIs. Our experts will work with you to implement best practices and the latest technologies to keep your data and systems secure from development to deployment.

Vulnerability Management & Penetration Testing

Our experts use the latest tactics, techniques, and procedures to perform comprehensive security assessments. We go beyond automated tooling to simulate real-world attacks, providing an in-depth analysis of your security posture.

About HanaByte

We are a team of skilled, empathetic individuals with a passion for cybersecurity. We believe in creating a safe and secure online environment for everyone, and we're committed to the pursuit of that goal.
